IN RED: things that have to be changed when finalizing the questionnaire.

Savings Behavior in Rural India: Shop Questionnaire

Notes to the enumerator:

- *Ask the questions the way they are written; do not say what is written in italics, those are instructions for your purpose only.*
- *Wherever we are recording amount in Rs, record the actual amount as it is, e.g. Rs. 500000 and not Rs. 5 lacs*
- *Wherever there are skips to be followed, the same has been mentioned. When it is not mentioned, it implies that you have to continue. On template: skips will be done automatically, so every question that appears should be asked.*
- *When we ask information about the last 7 or 30 days, the information should not include the day of the interview. E.g., if the interview takes place on Friday, the last 7 days are from Friday the week before till Thursday.*

INTRODUCTION

We are working with Basix Sub-K, and are doing a survey about the status of your shop and your activities as a BCSA. We have selected 18 BCSA in the area. We would like to ask you some questions. The objective of the survey is to better understand how BCSAs work, in order to be able to improve the banking services in the future. This survey is anonymous, only the people doing the survey know your identity and they will not communicate it to anyone else. We will only ask for your name and phone number because we would like to ask you a few other questions in a few months. So we need this minimal information to be able to come back to you.

We thank you very much for your collaboration.
