QE1.1 In total, how many accounts do you have and of how many SHGs, neighborhood groups or informal savings and credit groups are you a member? ☐
Check very carefully with the information in the household member roster and double check that the information received there is complete.

QE1.2 Can you answer the following information about all your accounts and groups?
Follow the same order as in the household member section. If an account was missing in the roster, add it as the last account here and update the household member roaster at the end of the survey. By accounts and groups we mean bank accounts, but also post office accounts, chit funds, BCSA accounts, deposits with self-help groups, neighborhood groups and other kind of groups.
JULIA: SHOULD WE ADD A QUESTION IN CSPRO THAT HAS AS ANSWER 1. MGNERGA 2. PENSION and that is skipped in case of the other accounts? I am thinking about spelling
I took out MFI, we do not have many and we can catch it under 10

QE1.2.1 Where is the account – what group are you a member of? *(*)*	**QE1.2.2** When did you open the account / start saving with the group? *MM/YYYY*	**QE1.2.3** If you want, can you deposit money on that account? *1…Yes* *2…No* *98 Doesn't know*	**QE1.2.4** Do you have a positive balance on this account? *Check with the roster!!!* *1…Yes* *2…No → Next Account*	**The question (***)**

(***)Now we would like to know whether you have specific objectives for which you are saving money on this account / with this group. When you deposit money on this account or do not withdraw all transfers immediately is that because you know that in the future you will have to pay for:

This is a twist on the version Julia has sent… Feel free to kill it ☺
(ideally the enumerators ask for this as if it is a focus group discussion: Start with:

- When you deposit money on this account or do not withdraw all transfers immediately is that because you know that in the future you will have to pay for something? For what?
    - If they answer for future expenditures, you can ask anything specific? If they say food: ask anything else? If they then say emergencies, you know emergencies is 'yes'. Than the enumerator can ask again if there is something else. If no, he can quickly go over the categories: education – business… but without forcing a 'yes'. A bit more demanding for the enumerators, but it would give exactly what we need. Well, you judge our enumerators ☺.
