Savings Behavior in Rural India: Village and Hamlet Questionnaire

Notes to the enumerator:

- *Ask the questions the way they are written; do not say what is written in italics, those are instructions for your purpose only.*
- *Wherever we are recording amount in Rs, record the actual amount as it is, e.g. Rs. 500000 and not Rs. 5 lacs*
- *Wherever there are skips to be followed, the same has been mentioned. When it is not mentioned, it implies that you have to continue. On template: skips will be done automatically, so every question that appears should be asked.*
- *When we ask information about the last 7 or 30 days, the information should not include the day of the interview. E.g., if the interview takes place on Friday, the last 7 days are from Friday the week before till Thursday.*

We are conducting a survey on the financial status of your village and its hamlets. In total, we have selected 18 villages in three different districts (Raipur, Dhamtariand Gariyabandh). The objective of the survey is to better understand how financial inclusion through the Business Correspondent model works, in order to be able to improve the banking services in the future. Our research project is funded by the Norwegian Research Council, and the main researchers are registered with the Government of India in Delhi. This project is in co-operation with Basix Sub-K and the Block Development Officer is aware of our presence.
We would like to ask you some questions about your village and its hamlets. This survey is anonymous, only the people doing the survey know your identity and they will not communicate it to anyone else. We will only ask for your name to be able to come back to you if needed.

Do you have any questions?
We thank you very much for your collaboration.
